So far as I are concerned a settlement can be made on the very lines outlined by ex-freshient Curie. His idea was that some word should come from the sevential Regiment A. The reports that the Cornell-University of Pennsylvania race will take place on the new course near Philadelphia are not true. No place has been selected, although several cities are bidding for the race. Syracuse is making the strongest effort to have the contest take place or Groundaga Lake.

As soon as the crew candidates get thoroughly acquainted with their work, so that they can be left to themselves while at work, ceach Couriney has intimated that he will slip up to Cambridge for a few days and take a look at the Harvard candidates, presumably with the intention of giving them a few points. COMPANY F'S GREAT SHUOTING. They Brenk All Records at the Servit Regiment's Range.

If the members of the Seventh Regiment continue to break records as they have done in the past two weeks, there will be no records left to break. On Thursday night Company B's team broke all records in the Kemp Trophy match by making 565 points at the 500-yard range, and a total of 1,073 points. It was thought that this record would stand for was thought that this record would stand for some years, but last night, for the same trophy, Company F's team scored 531 points off hand, leating Company B's record of 527 points, and tied Company B's record of 528 points at 500 yards, making a total of 1,008 aus d a possible 1,250 points, which is a wonder of a possible 1.250 points, which is a wonder-ful performance for a team of twents-five mes. The great improvement in shooting recently shown by the rank and file of the Seventa beginnent is largely due to the untiring efforts of Capt. Palmer and Corporal G. M. Carnochas of the ride club. YALE'S CHEW IN THE TANK.

Says They Are Very Green.

New Haven, Jan. 23.-Yale's 'varsity crew yesterday afternoon. He kept them at work for an hour. This was the first time that he had seen the crew. In speaking of them he

h "Capt. Johnson has a stocky-looking lot of men to begin on, but they are very green, and even the men who rowed last year have a lot to learn. It will be very hard to fill the position to learn. It will be very hard to fill the position at atroke left vacant by Gallaudet. Rogers, who is rowing there now is a good carsman, but he is not strong enough to stand the strain which will come on him, and I fear that Johnson will not he able to keep him there.

Cass is very heavy for the waist of the boat, and he will have to get every motion perfect to carry his big inad of beef. Johnson will have to do not most of his coacring, as lew of the old coaches will be able to visit New Haven.
